PATENT

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1 1. (Original) A method employing a location verifier system for verifying that a
2 user is located within a predefined geographical area, after which the user is allowed to place a
3 telephone wager on a sports book, the method comprising:

4 receiving by the location verifier system, a telephone call from the user requesting access
5 to the sports book;

6 forwarding a verification number to the user, the verification number being received by
7 the user only if the user is located within the predefined geographical area;

8 receiving the verification number from the user;

9 verifying the verification number forwarded is the same verification number received;
10 and

11 permitting the user to place the telephone wager on the sports book.

1 2. (Original) The method of claim 1 wherein forwarding the verification number
2 further comprises

3 forwarding the verification number to a user pager operable only within the predefined
4 geographical area; and receiving the verification number further comprises

5 receiving the verification number from the user after the verification number is retrieved
6 from the user pager.

- 1 3. (Original) A verification system comprising:
 - 2 a transmitting system having one or more transmitters;
 - 3 one or more pagers for communicating with the transmitting system;
 - 4 a control system for receiving a signal requesting remote access to a betting system;
 - 5 upon receipt of the signal, the control system forwards an authorization number to the
 - 6 transmitting system;
 - 7 the transmitting system forwarding the authorization number to the user pager;
 - 8 the user pager being capable of receiving the authorization number only when within the
 - 9 predefined geographical area; and
 - 10 a communication channel for returning the authorization number to the control system
 - 11 after receipt by the user pager, such that the control system allows remote access to the betting
 - 12 system after the authorization number is received.
- 1 4. (Original) The system of claim 3 wherein the betting system is for allowing
- 2 gamblers to place wagers on various sporting games and events.
- 1 5. (Original) The system of claim 3 wherein the control system is a casino control
- 2 center.

PATENT

3 6. (Original) The system of claim 3 further comprising wherein each user pager is
4 assigned to a gambler.

1 7. (Original) The system of claim 3 wherein the transmitting system further
2 comprises

3 three transmitters each tactically placed relative to each other to cover the predefined geographic
4 area.

1 8. (Original) The system of claim 3 wherein the signal is a telephone call.

1 9. (Original) The system of claim 3 further comprising
2 a computer system communicably coupled to the communication channel for generating
3 the signal and for returning the authorization number to the control system.

1 10. (Original) A method used by a location verifier system for verifying a user's
2 location within an area to enable remote access to a betting system, the method comprising:
3 receiving a signal for requesting access to the betting system;
4 randomly generating a verification number responsive to the signal;
5 forwarding the verification number such that the verification number travels no further
6 than a predefined geographic location;
7 receiving the verification number; and
8 if the verification number forwarded is the same as the verification number received,
9 allowing remote access to the betting system.

1 11. (Original) The method of claim 10 wherein forwarding the verification number
2 further comprises

PATENT

3 forwarding the verification number to a user pager, and receiving the verification number
4 further comprises

5 receiving the verification number from the user.

1 12. (Original) The method of claim 10 wherein forwarding the verification number
2 further comprises

3 forwarding the verification number such that a user or system located outside the
4 predefined geographic area is unable to receive the verification number.

1 13. (Original) The method of claim 10 wherein the signal is a telephone call from a
2 user.

1 14. (Original) The method of claim 10 wherein the signal is sent via a computer and
2 a modem.

1 15. (Original) A method of verifying a user's location within an area to allow remote
2 access to a gambling system, the method comprising:

3 providing a pager to the user, the pager being operable only within a predefined
4 geographical area;

5 communicating by the user, with a control center when the user desires to remotely
6 access the gambling system;

7 generating by the control center, a number for verifying that the user is within the
8 predefined geographical area;

9 forwarding by the control center, the number to the pager, the pager receiving the number
10 only when within the predefined geographical area;

11 forwarding by the user, the verification number to the control center; and
